ACCEPTANCE : MAY 2023

THIRD INTAKE

REGISTRATION : JUNE - JULY 2023
TEST : JULY 2022
ACCEPTANCE : JULY 2022

What they say

Biology has been my favourite subject since high school. I have an interest in the conservation field so I chose Biology at UGM. Studying in english gives me more focus when learning, so I chose the IUP program. Availability of a double degree program, international exposure, and student exchange overseas is what I am achieving for, here at IUP Biology.

Julio, IUP Bio 2019

Despite my interest in Biology, and UGM being the top uni in this field, I'm interested in pursuing my studies in IUP Biology UGM because they provide an international standard curriculum with a lot of international exposure opportunities.

Aisyah, IUP Bio 2019

I decided to pursue my studies in IUP Biology UGM because I have always been interested in the biological field and knew that this is the path that I would like to take in my life. Knowing the processes that happens inside living organisms and the reasons behind those processes intrigued my interest.

Faizah, IUP Bio 2019

I've always found biology as the most interesting branch of science ever since I was in middle school. Why I specifically chose IUP in UGM was because it helped connect the students to opportunities abroad. I've also always found studying biology in English easier for myself because it's what I've been taught in. In addition to that, the prospect of taking a double degree for my bachelor years is what solidified my decision.

Mutia, IUP Bio 2020

it's a great thing to such have opportunity to join in the best iup program. my dream is to become marine biologist and i know that iup biology can help me achieve that dream also i know that iup biology ugm is the best iup biology in indonesia

Reiza, IUP Bio 2021

The reason why i chose to study in Biology is because i've always enjoyed learning the subject ever since i was in high school. I also chose to study in the international program because i think it would provide me with the chance of getting the international exposure and to have the opportunity to study abroad in the future.

Hafsyah, IUP Bio 2019

Test Scheme

DAY	TEST
Day 1	Academic English Proficiency Test (AcEPT)
Day 2	Gajah Mada Scholastic Test (GMST)
Day 3	Interview

Know us more

Why study Biology?

Biology is fundamental part of most living world. It's about all the ticking gears on clock of living things.

Choose to study the biology with us and you will be set for a fascinating three and half years. If that reason wasn't enough to sway you, here are six reasons why you should choose to get your Bachelors in International Undergraduate Program (IUP) of Biology UGM.

Why Us?

UGM is the best university in Indonesia.

Moreover, Faculty of Biology holds the 1st Indonesia's biology program and World University Ranking by Subject 2022 in Biological Sciences. Our curriculum has been Internationally certified by AUN-QA and Accredited by ASIIN. The Professors in IUP-Biology UGM are the best experts in their fields.

All classes of IUP Biology UGM will be delivered in English, in super friendly environment. We will assure you that you will enjoy studying with Us.

Accredited Degree Programme

2018-2023

Six reasons to study Biology with us:

1. Flexibility

Where more specific degrees like Microbiology, Forensics or Biochemistry keep you in one particular biological discipline, IUP Biology UGM lets you taste a little bit of everything. Some courses will let you specialize in a particular area of interest but that remains your choice.

2. Lab and field works

In this program, you aren't just let to sit in class rooms but our course also accompany with myriad of lab works and field works. These will build up your skills and experiences. You'll be working in a team, so you will develop skills in communication, delegation, research and management.

3. International Exposure

Our program is designed to expose the students to international experts through international visiting professor program.

4. International Internship Program

You will be facilitated to have internship in international companies or universities around the globe. Our program has many partner universities who will accommodate your internship. Some of our partner universities are in Malaysia, Australia, UK, the Netherland, Japan and Korea.

5. Research

You have opportunity to conduct research for your own undergraduate thesis, based on your interest, either in Functional Biology and Development, Environmental Biology and Biodiversity, or Molecular Biology and Biotechnology with the tutelage from experts in our program. Not only this is exceptionally fun, but it'll help develop the kind of skill employers sought after.

6. Postgraduate options

After completing the undergraduate program through IUP, students may have specific entree to the Master's degree at the Biology Study Program, Master Program, Faculty of Biology or the International partner university.

Make us your No. 1 choice

Degree Options Single Degree

The degrees to be awarded are Bachelor of Science with honors (B.Sc.hons.) in Biology of Department of Tropical Biology, Faculty of Biology, Universitas Gadjah Mada. The degree title awarded is in accordance with Regulation of the Minister of Education and Culture of the Republic of Indonesia No. 154/2014.

Double Degree

Students who choose Double Degree program will receive a Bachelor of Science with honors (B.Sc.hons.) degrees from Universitas Gadjah Mada and from the partner universities. Currently, Faculty of Biology UGM has established Double Degree program with Australian National University and University of Leeds.
